DETAILED ACTION

Summary

On September 23, 2005, the Applicant filed an after final amendment. On October 27, 2005, an advisory action was sent to the Applicant re-opening prosecution. On September 22, 2006, a non-final action was sent to the Applicant rejecting claims 1-26. On December 22, 2006, the Applicant responded by canceling claim 26.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1-6 and 14-25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Coutts (6,311,165) in view of Soltesz (2001/0011680), as set forth in the previous Office Action.

Claims 7-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Coutts in view of Korman (6,318,536), as set forth in the previous Office Action.

Response to Arguments

Applicant's arguments filed December 22, 2006 have been fully considered but they are not persuasive. The Applicant argues that neither Coutts nor Soltesz discloses or teaches the retrieved software being used for controlling operations of respective transaction units within the kiosk or the software being retrieved from the transaction units. In response, Soltesz teaches that new programs may be uploaded or downloaded into the device to keep up with new advances in processor, memory, and communications technology (p.3, 34). These programs may be uploaded or downloaded into the kiosk in order to update/control operation of the transaction units within the kiosk. Thus, the Examiner found motivation to combine Soltesz with Coutts as a teaching of updating the technology and enabling the addition of new units.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
